

HealthSight · ML for Radiology

Project: HealthSight · ML for Radiology

Description: PyTorch CNN for chest X-ray classification, 0.92 AUROC, MLflow tracking.

Technologies: Python, PyTorch, pandas, MLflow, SQL

Role: ML Engineer

Dates: 2025-03 · 2025-07

Responsibilities: Curated dataset; Trained model; Deployed batch inference

Outcomes: 0.92 AUROC; Paper submitted

Repository: <https://github.com/rohan-desai/healthsight>
